

Kelin waterborne epoxy adhesive is a high-end environmental product. Matte texture, provides you a low-key luxury decorative style, and the joint surface looks perfect fit to the ceramic tile. Varieties of colors, let your decoration place sparkling. The subbase course of waterborne epoxy resin makes the product absolutely environmental. Natural sand calcined at high temperature makes the color more natural and beautiful and never fades. The product can be better used in the joints of ceramic tile, stone, glass, mosaic tile on the wall or flour in bathroom, kitchen, bedroom and so on. It is a preference product in family decoration, adding negative oxygen ion to purify air. Australia joint research and development products to make the better performance, and through the Chinese Academy of Sciences strategic quality control guidance, to make products' quality stable. If you choose grout sealant supplier, please choose Kelin.

Varieties of colors for your choice. Also provide custom colors.

The image displays a comprehensive color palette for gap finishes, organized into two main sections: silver/gray tones and gold/brown tones. The palette includes 25 distinct finishes, each shown as a horizontal bar with a corresponding label. To the right, two photographs illustrate the application of these finishes in real-world settings. The top photo shows a modern bathroom with a white bathtub and toilet, featuring a silver/gray finish on the wall and floor. A circular inset provides a close-up of a silver/gray finish at a T-junction. The bottom photo shows a living room with a dining table and chairs, featuring a gold finish on the wall and floor. A circular inset provides a close-up of a gold finish at a T-junction.
